Jay,

I've attached a few sit reps from overnight. Here are a few developments from overnight.

We had approx. 20 OPP attend for immediate deployment which was a great help. They are planning for a more robust, lengthy deployment as we speak.

Protester Developments:

- Tecumseh Rd W (N/B) was blocked completely, as well as east and west temporarily. All was cleared a short while later
- Protesters moved to Wyandotte W at the bridge entrance. They blocked all w/b lanes leading up to the entrance. Our officers were monitoring and when a truck tried to enter, all protesters exited their vehicles and blocked the entrance on foot. Long line of trucks began to increase east on Wyandotte. Some truckers tried to jockey their way out and got stuck on California and to my knowledge are still there.
- Trucks went back to Campbell
- Protesters at some point yesterday moved a couple of pickup trucks to the north bound lanes, where we once had blocked. No one knows when those trucks moved in. We are still blocking the n/b lanes at Tecumseh.

I will send some drone pics
